We've looked at some more fescue forage samples from stockpiled grass and the protein level is down. It's adequate for dry cows, but needs to be supplemented for nursing cows.

ENERGY SAVING TIPS

To cut down on your winter heating bill, tightly seal any unused exterior door. Doors which lead to unheated areas of the house should be insulated and weather stripped.

When you fill up with fuel, choose the correct octane for your particular car. Using the wrong octane might cause engine problems, spark plug fouling and reduced gasoline mileage. Avoid a higher octane fuel than required - or you'll be wasting money.

If you are using more than one rack in your oven, do not place a dish directly over the one on the rack below. Staggering the cooking utensils will allow better heat circulation and minimize cooking time.

Purchase equipment such as automobiles, appliances, pumps, fans, compressors and boilers on the basis of both initial cost and operating costs rather than on the basis of purchase price alone. Often products that are more expensive initially, but are energy efficient, will cost less over a period of years than lower priced products that consume more energy.

Are you considering the purchase of a new 1976 car? Remember that an automatic transmission can be a gas-using operation. Manual transmissions generally use less gas, particularly in small cars, although this may not hold true in situations where frequent shifting is required.

Plan your driving routes to avoid local bottlenecks such as extra long lights and congested streets. Avoid rush hours and other peak traffic times whenever possible.

Use only the amount of water required to make steam and avoid sticking when cooking either frozen or fresh vegetables. The water will heat faster and you will conserve energy. Remember to reduce cooking to a simmer as soon as the steaming point is reached and to use a pan with a very tightly fitting cover. Vegetables will retain more vitamins and minerals and also taste better.

The direct deposit of Social Security checks, made simple by Fidelity.

It's not how fast you get your Social Security money in the mail that counts.

It's how fast you get it in the bank.

Because you can't earn interest and you can't write checks until it's safely deposited in your savings or checking account.

Now Uncle Sam has made it easy for you to beat the time-consuming runaround from mail to home to bank.

Now, every month like clockwork, your money can be credited directly to your account—automatically. There's no waiting for the mail, no running to the bank.

Everything is automatic. Questions? We'll answer some of the most important ones here.

1. How will I benefit from this new program?

Most importantly, you won't have to make a special trip to the bank to deposit your check—and you won't have to worry about the check being stolen or lost in the mail. And even when you're away from home, your check will be deposited for you automatically.

2. Can I have the money deposited in either checking or savings?

Yes. But by law your Social Security check must be deposited directly to only one account—either checking or savings.

Fidelity can, however, set up a system that will automatically transfer a specified amount every month from checking to savings. Just ask for details when you come in.

3. How do I sign up?

It's a simple form and we'll be happy to help you fill it out.

4. Is there any charge for this service?

No. It's completely free from Fidelity.

5. After I sign up, when will the bank start receiving my check?

Probably within a month or two. (Until then, your checks will continue to be sent to you.)

6. How do I terminate the program?

It's easy: just call your Fidelity banker and your Social Security office. You can end your participation in the program any time you want.

7. What if the amount of my check changes?

You'll be notified in advance and the full amount of your new check will be deposited.

8. I get payments from both Social Security and supplemental income. Can I have both checks credited automatically?

Yes. Just complete a separate form for every source of Social Security income.

9. My spouse and I receive a check jointly. Can we participate in this program?

Sure, as long as the account is in both names.

10. Can I have my check deposited directly to my spouse's account?

No. The account must carry your name.

11. Can my children's checks be deposited to my account?

If the checks carry your name as representative payee, they may be deposited to your checking account. If you wish to deposit these funds to a savings account, you must have a separate account for each child.
